🎓 EDUCATIONAL BACKGROUND

Full Stack Developer [MERN]
BootCamp Nuclio Digital School [October 2022 - March 2023]

Development of a **Slack clone** as a master project. Based on **React** and implemented using the following libraries: **Express, Moongose, Sockets, Cloudinary and Mailgun.**

The project was developed jointly with 4 colleagues in **5 sprints of 2 weeks** using agile methodologies.

The project includes many components, contexts, API Wrapper, private routes, image upload among other developments.

My participation was very active involved in both **frontend and backend.**
